

**ECE 224: Early Childhood Education Methods I**  
**Continuous Assessment: Activity Plan**  
**20 points**

**DUE: 20 November 2019**

NOTE. This is an INDEPENDENT assignment.

**Purpose**

The purpose of this assignment is to design a learning activity using any of the teaching methods discussed in class. The learning activity can be for the whole class, small groups, and/or pairs of children. It can be for any age of children in ECE (0 to 8 years). It can be as short or as long as is needed to meet your learning objective. Use the Activity Plan presented in class to plan your learning activity. Your learning activity should be designed to achieve any one of the learning objectives below.

- Pupils will improve their fine motor skills.
- Pupils will improve their oral language skills.
- Pupils will improve their ability to count.
- Pupils will improve their social skills.
- Pupils will improve their science observation skills.
- Pupils will improve their listening comprehension skills.

**Activity Plan**

**Name of Activity.** Give a brief title for the activity.

**Average Age of Pupils:** Write the typical age of children who will participate in the learning activity.

**Size of Group.** Indicate one of the following: Large, Small, or Pairs.

**Learning Objectives:** List the learning objective(s) that will be accomplished through the learning activity. Only one learning objective is fine, though a few learning objectives is preferable.

**Brief Description of Activity:** Briefly overview the learning activity, explaining how the learning activity will meet each learning objective. (2 or 3 sentences)

**Procedure:** Write a step-by-step guide for the learning activity. Be sure to list specific questions that will be asked (if needed). Note that any person reading this activity plan should be able to deliver the lesson based only on the details given here. This means the Procedure should be **very** specific.

**Materials:** List any materials that will be needed for the activity. If none are needed, write None.

**Reflection:** This section is completed *after* a learning activity has been completed. Since you will not actually be implementing this learning activity, do not include it in your assignment.

**Evaluation**

Students will be evaluated based on the following.

- Learning Objectives (3 points)
- Brief Description (3 points)
- Procedure (10 points)
- Materials (3 points)
- Overall clarity and quality of lesson (1 point)
