

Pyramid Model of Child Discipline

Dr. K. A. Korb
University of Jos

Pyramid Model

- Promote positive behavior in the classroom through promotion, prevention, and intervention
 - **Promotion:** Support or encourage a cause
 - **Prevention:** Stop something from happening
 - **Intervention:** Alter a result or course of events

Pyramid Model

- The amount of space dedicated to each part in the pyramid reflects how much time and effort a teacher should give to that part
- If the teacher works hard at promoting a caring learning community, then intervention for misbehaviors will be a very rare occurrence
